

Hydraulic Chair / Bed Instructions:

1) Press pump in order to elevate the bed.

2) Press pump all the way down to release the pump and Lower the Height.

3) Push pump Pedal Up in order to stop the bed from moving. This is a curtsey stop.

- 4) Most of Our Hydraulic beds have Two Springs.
One for Leg Extension and one for Back extension.

The springs need to be hooked into its whole on the Bars, as it's shown in the pictures.
